RE: *Greenwood Construction Company Limited  
Peer Review of Air Quality Assessment - Violet Hill Pit, Part Lots 30, 31, and 32, Concession 4 in the Town of Mono, County of Dufferin, Ontario.  
OPA and Zoning By-Law Amendment Application  
Town of Mono, Ontario*

Dear Mr. Greenwood:

Trinity Consultants Ontario Inc. (Trinity) is pleased to provide Greenwood Construction Company Limited (Greenwood) the following information in response to the environmental peer review comments provided by R.J. Burnside & Associates Limited (Burnside) for the above-referenced site, dated December 21, 2017. The comments were provided to Greenwood by the Town of Mono in response to submission of the following Trinity report and letter.

**Air Quality Assessment (AQA) Report, Violet Hill Pit, Town of Mono, prepared by Trinity Consultants Ontario Inc. (Trinity), dated March 2016.**

**Letter from Trinity Consultants, dated June 30, 2017 and Drawing prepared by Rollings Hyland Consulting page 2 of 5 dated July 7, 2017**

These documents were completed in support of applications to amend the Official Plan and Zoning By-law to obtain a licence under the Aggregate Resources Act (ARA) for proposed gravel pit operations on lands owned in the Town of Mono. The application will be for a Class 'A' Licence to Operate a Pit above the known water table. Responses to the peer reviews of the submitted AQA report and follow-up letter is provided below as a copy of the peer review comments followed by Trinity's italicized response.

## BURNSIDE AIR QUALITY PEER REVIEW

As noted in the Trinity letter the proposed asphalt treatment of the entrance/exit road from the limit of 3<sup>rd</sup> Line EHS to the extraction limit should stand and will reduce dust caused by trucks and vehicles entering and exiting the site. Internal roads being treated with asphalt grindings will serve to further reduce onsite dust however, a complete dust suppression plan would formulate part of the applicant's requirements should the application be approved.

*This is addressed in the prepared "BEST MANAGEMENT PRACTICES PLAN FOR FUGITIVE DUST" (finalized January 2018).*

We hope this supplemental information meets the requirements of the Town of Mono and addresses the peer reviewer's comments. If you have any questions or comments about the information presented in this letter, please do not hesitate to call me at (416) 391-2527.

Sincerely,  
Trinity Consultants
